The Expert's Choice for an External Filter

Features:

1. Powerful motor and ultra-quiet design for silent, interference-free operation. High capacity high output design increases filter volume to provide clean water quality at all times.
2. New Valve Design with manual/automatic pumping for ease of use.
3. Energy-saving and environmental friendly design, built-in safety and CE certification, very safe and reliable.
4. Detachable water inlet/outlet design for easy cleaning and fast installation.

Expert's Choice Micro-organism Culture Material

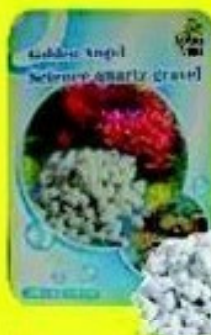

Description:

1. It is naturally formed the numerous fine pores in technical burnt to culture beneficial bacteria. It can reproduce the abundant bacteria colony to use it with multi-functional bacteria pack inside.
2. The multi-functional bacteria pack in this filtering package supplies the strong effective "adhesive decomposer" that can rapidly absorb the nitrite, ammonia and nitrate, then inspires biological living bacteria to reproduce immediately. This will constantly decompose the poisonous substances, eliminate harmful chemicals, reduce germs and algae and strengthen the fish immunity. The well growing bacterial system can accelerate biological balance and make the cleanest water condition.
3. It is specially developed for those high water quality demand fish like Arowana, Marine and plant aquarium.

Description:
Golden Angel Science ceramic quartz the perfect filter media contains active bacteria and numerous cultivation pores.

Science Ceramic Quartz

Description:
Golden Angel Science Quartz Gravel the perfect filter media contains active bacteria and numerous cultivation pores.

Science Quartz Gravel

Description:
Golden Angel Excellent science quartz culture ring the perfect filter media contains active bacteria and numerous cultivation pores.

Excellent Science Quartz Culture Ring

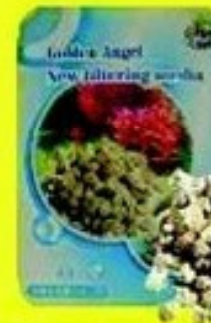

Description:
Golden Angel Macromolecule Reviver Bamboo Carbon promote healthy, deodorization, antibacterial, revive the clear water.

Macromolecule Reviver Bamboo Carbon

Description:
Golden Angel Hydrogen Anion Exchange Resin helps soften water, lower the pH value, easy and convenient to use.

Hydrogen Anion Exchange Resin

Descriptions:
Golden Angel Breathing Bio-ceramics is made from well-burnt special breathing ceramics. The extra large surface with high breathing capacity is extreme benefit culture nitrifying bacteria.

New filtering Media (Breathing Bio-Ceramics)
