

# Product Catalogue

Product & Services: Tanks & Cabinets Setup & Installation Services, Arowana Resale Centre, Onsite Consulting and Emergency Assistance, Arowana Holiday Inn, Arowana Hospital, Aquatic Equipment and Accessories, Aquatic Equipment and Accessories, Exotic and Ornamental Fishes & Arowanas, Aquatic Plants, Fish, Tank, etc.

## CLOUDLESS QUICKLY

### Functions:

1. It enables newly changed aquarium to clear almost immediately. It can then be filtered away, making the water clear in a very short time.
2. It softens the water, lowers hardness, reduce pollution and growth of algae.
3. Newly set-up tanks with aquatic plants will not get affected. The water clears quickly, but does not harm the plants and any nitrated bacteria in the tank.

## WATER STABILIZER

### Functions:

1. Gets rid of toxins derived from heavy metals & harmful remains of medication. Reduces pH fluctuations & gives a protective slime coat to the sensitive skin of fishes.
2. It also reduces stress. Use Water Stabilizer immediately when there is an upset of water condition when changing water.
3. When setting up new aquarium tanks or changing water, the fishes are able to acclimatize to the new water environment easier & faster.

## BLACK WATER CONCENTRATES

### Functions:

1. Strengthens the immune system of fishes against diseases and enhances their body color.
2. Contains large amount of botanical hormones and vitamins, which helps to induce spawning.
- 3) Reduces pit, makes photosynthesis easier and encourages nutrients absorption.

## ACID ADDITIVE

### Functions:

1. Lowers pH value to an optimum range. Contains useful minerals for the growth of both fishes and aquatic plants.
- 2) Contains buffers to stabilize the pH value to around 6.5, which is the most suitable pH for aquatic plants and fishes like tetras, cichlids and discus.
- 3) The contents in Acid Additive are made from natural ingredients, which is stable and safe for aquarium use.

## BACTERIA SPECIFIC MEDICINES

### Functions:

1. A very effective anti-bacteria medication. Specially formulated for curing mouth fungi, rotten fins, rotten tails, rotten gills, blur eyes, projected eyes, red spots, protruding scales & other kinds of diseases in most freshwater fishes.

## WATER PLANTS CHELATED FERRITE SUPPLEMENT

### Functions:

1. Contains huge amount of highly efficient chelated ferrite liquid. Made up of organic iron complex, which is an important element for the growth of water plants. It can prevent red colored plants from having white spots & fading hues.
- 2) This special formula maintains the chelated ferrite level in the water longer, enabling water plants to absorb more of the ferrite nutrients for growth. It is highly recommended to use this supplement on a small amount, but frequent basis.

## ALGAE ERASER

### Functions:

1. Very effective in controlling the growth of most algae. It is also able to dissipate any surface oil traces.
2. Use Algae Eraser regularly and avoid using strong lightings to prevent algae bloom.
3. Algae Eraser is safe for fishes, if dosage is followed accordingly. It does affect water condition. To prevent growth of algae, use 1/2 of the suggested application.

## WATER PLANTS NUTRITION

### Functions:

1. An absolutely necessary balanced nutrition, containing nutrients, trace elements and ferric compounds.
2. Easily absorbed by plant leaves, it helps water plants to grow faster & healthier. Root system will also get better.
